Concerned about your child's future?

Globalization has increased pressure on our children. Do you want your child to score well in his exams.

Do you want to improve his concentration, memory, visualization, creativity, self-confidence. STOP WORRYING!!

The Solution

Master Mind's unique brain development program, MASTER MIND ABACUS..... IS THE ANSWER.

Abacus & How it is used?

Abacus is an ancient counting device which originated in China. It is still used today in various parts of Asia and North America.

Abacus is used to teach children (in the group of 4-14 years) how to add, subtract divide and multiply with numbers and decimal numbers.

To start with, the children are taught to do mental calculations without from 1 to 99 using Abacus.

Subsequently the children are taught to do mental calculations without abacus.

Mental Arithmetic is extremely beneficial as it not only develops the brain, it also increases the speed with which the child calculates. After the completion of the course the child will be able to calculate faster than a calculator & that too, mentally, enabling the child to attain greater concentration, visualization, creativity, better listening, observation power, improved memory, retention and recalls power. Further more making the child SELF CONFIDENT.

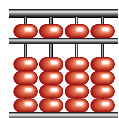

What is Mental Arithmetic & how it helps to develop the brain?

Mental Arithmetic is a method of stimulating the brain to do arithmetical calculations without using a calculator, pe, paper or Abacus.

It is scientifically proven that if one uses his right hand left brain gets activated. Use of left hand develops right brain.

The fundamental of abacus enables the child to use both his hands, which develops both (left and right) Brain of the child.
